# Linux OpenConnect Details & Instructions

## Installation
Install the openconnect package from your distribution's repositories.

## Usage
OpenConnect can be used with NetworkManager, or manually via the command line.

### NetworkManager (Optional, but recommended)
Install the networkmanager-openconnect package. After installation, restart your computer. Then configure and connect with *nm-applet* (network manager's tray icon utility) or similar utility. You will want to connect to the server rbhs-vpn.rbhs.rutgers.edu.

### Command Line
Simply run openconnect as root and enter your username and password when prompted:

```
# openconnect rbhs-vpn.rbhs.rutgers.edu
```
